C-Mount

EagleEye C-mount with Carl Zeiss lens

EagleEye C-mount with security camera lens

C-mount and Standalone GoPro™ kit

Hero™ vs EagleEye

GoPro™ Hero™ 3 has a fantastic super wide angle lens. Quite often it is desirable to have different focal length lens. TPL has designed a unique solution providing standard GoPro™ Hero™ 3 housing together with a C-mount compatible optical system. Any C-mount lens having a focal length of 15-200 mm and f-stop of f/5 or faster would be an ideal companion for EagleEye. The adapter also has a standard 1/4-20 tripod mount. The amazing GoPro™ camera can now use any photographic lens with a C-mount adapter ring. Standard C-mount adapters for Canon™, Nikon™ and other photographic standard lenses enable all of the lenses to be used with the versatile EagleEye.

Hero™ 3 cameras provide 12Mpixel photo and video recording capability, including 1080p at 60fps using standard H.264 format (EagleEye adapter might have some vignetting depending on the camera modes selected and the lens used). Cameras can be remotely controlled by WiFi with smartphones and tablets. GoPro™ devices can simultaneously record photos and videos.

Connect patent pending EagleEye to any telescope or microscope with C-mount adapter!

	EagleEye C-Mount
Attachments	Tripod mount (standard)
Camera	GoPro™ Hero™ 3 housing (camera not included)
Field-of-View	Any C-mount lens having a focal length of 15-200mm and f-stop of f/5 or faster is ideally suited
